Need a male mike connector for an Azden PCS 3000, or a Phone number where
one can be found...Thanks! This is a 12-pin connector.

>worthless.

Absolutely not. Most of these functions listed are not used every day. Personally, I think what this is actually saying is that Kenwood radios are so feature-pact that it's worth more money than what they sell it for! I don't know, but do Icom and Yeasu radio have this many features?

I don't know about you, but I'd rather climps at a sheet of paper than look through the manual for something. Wouldn't you?
